Velcro system prevents drape movement

Attractive color options — for a sophisticated look

With more choices, you can make a **bold visual statement**

Pipe and drape as a temporary wall, or backdrop for audio/visual functions

Colorful pipe and drape as aesthetic temporary room dividers

Table skirting can match or compliment the drape selection. Skirts are available in three styles of pleat, six materials, and multiple colors.

Skirting can also be used to give a more attractive appearance to your AV carts, trash receptacles and other supporting items.

Unique™ Pipe and Drape — an attractive, dependable solution for:

- Sides/back of a temporary stage
- Exhibit booths at trade shows or other public events
- Covering up a work area, construction area, or other areas not for patrons' eyes

Anodized Uprights

Pipe uprights are made of anodized aluminum tubing. Anodizing allows aluminum to maintain its metallic appearance. The anodizing process produces a hard transparent surface that is integral with the base aluminum, resulting in a durable and attractive product which has a long life span and is easy to maintain and clean.
